Dear Parent or Guardian,

Your child _____ was screened today for possible vision problems by trained volunteers from Lions Clubs International.

No vision problems were detected; however, it is important to realise this screening does not replace the need for regular eye examinations by an optician.

The NHS guidelines state that children's vision will change overtime, so if you are worried at any time that your child is not seeing properly, you should arrange to see an optician or your General Practitioner (GP).

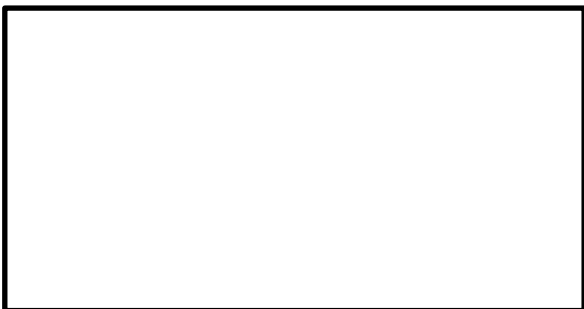

The NHS offers free, comprehensive eye tests for all young people under the age of sixteen. To find your local optician, please visit the NHS website www.nhs.uk/service-search.

Lions British Isles and the NHS Public Health bodies recommend vision screenings and professional eye examinations as part of regular healthcare assessments for children.

If you have any questions about the screening, please feel free to contact your local Lions Club or email vision@lions.org.uk.

Yours sincerely

Volunteers from the _____ Lions Club
